

## PDC Snipster – Readiness Checklist

### Python Knowledge

- ☐ I'm comfortable writing functions, using loops, and working with lists/dicts
- ☐ I've used classes and understand `__init__`, `self`, and attributes
- ☐ I've used modules and understand how to import my own Python files

### Tooling & Dev Workflow

- ☐ I've used `venv` or `uv` to manage a Python project
- ☐ I've used `pytest` to run tests and read test failures
- ☐ I've worked with Git: clone, commit, push, and pull
- ☐ I've created a GitHub repo or opened a pull request before
- ☐ I am familiar with databases and/or ORMs

### Project Experience

- ☐ I've written a small script or project with 2+ files
- ☐ I've passed data between functions/modules (not all logic in one file)

### Bonus (Good to Have)

- ☐ I've seen or used a CLI tool like `http`, `grep` (or `ag`) or `pytest`
- ☐ I know what an API is and have used `requests/httpx` to fetch data
- ☐ I've tried a code linter like `black`, `ruff` or `flake8`

---

## Scoring (Self-assessment)

- **10+ boxes**  Ready to thrive!
- **<10 boxes**  You're getting there — we recommend starting with the [PDC Foundations](#) or [PDI 1:1 Coaching](#) first.
